LE ROCHER — Elegant high-end ground-floor unit in the heart of La Petite-Patrie, developed in collaboration with McComber and MURMUR Intérieurs. Spanning two levels, it offers 4 bedrooms, including one in the basement, as well as 2 full bathrooms. The primary bedroom features an ensuite bathroom. Bright living spaces highlight a refined kitchen with a large central island. Meticulous finishes, superior soundproofing, an intimate terrace, and a landscaped yard with the possibility of parking complete the offering. A distinctive property combining comfort, design, and quality craftsmanship.

LE ROCHER PROJECT – Where design, performance and sustainability come together. Ideally located in the heart of La Petite-Patrie, the De La Roche project presents an architectural achievement designed by the firm McComber, in collaboration with MURMUR Intérieurs. Conceived with a contemporary and sustainable approach, this reimagined triplex stands out for the quality of its design, the nobility of its materials and the attention devoted to every detail. Driven by a carbon-neutral vision, the project reflects a modern take on urban living. Comprising only three units, De La Roche offers generous, light-filled and thoughtfully designed spaces, where design, comfort and functionality are seamlessly integrated. - Architecture by McComber, in collaboration with MURMUR Intérieurs - Prime location in a sought-after neighborhood, within immediate proximity to services and vibrant local life - Possibility to customize interior finishes (limited time) - Construction aligned with a Net Zero approach - Generous volumes and layouts adapted to contemporary lifestyles - Signature kitchen with approximately 40 linear feet and a 9-foot central island - Superior soundproofing between units - Respectful integration into the existing streetscape with preservation of the original façade - High-end finishes and carefully selected materials (technical specifications available) - Intimate 3-unit co-ownership with potential for conversion to divided co-ownership Particular attention has been given to the building envelope's performance. The integration of bio-based insulation, such as wood fiber and hemp, helps reduce the carbon footprint while enhancing overall comfort. Air tightness, optimized both at the exterior envelope and between units, improves energy efficiency and
